

G2262™

Product Description and Application:

- G2262Green phosphor is designed for green illumination devices and is good as one of the components in warm white and other bluish green color applications.
- Higher efficiency is achieved with shorter excitation wavelengths ranging from 200nm to 450nm than longer excitation wavelengths of 460nm to 480nm.
- High brightness green LEDs using this phosphor are ideal for various LED lighting applications such as signals, signage, decoration and RGB display backlight.
