

G3161™

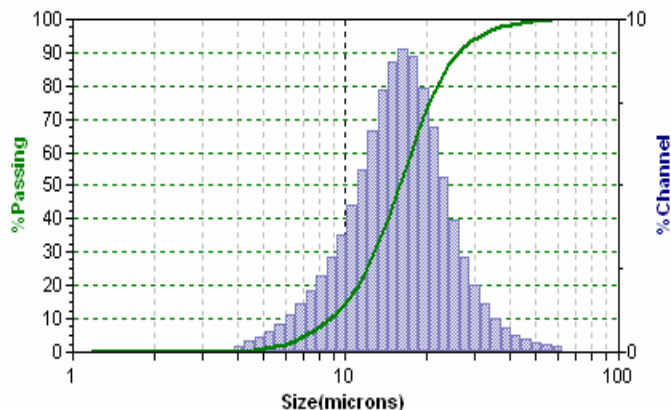

Product Description and Application:

- G3161 Green phosphor is designed for green illumination devices and can be used as one of the components in warm white and blue-green applications.
- Higher efficiency is achieved with shorter excitation wavelengths ranging from 200nm to 450nm than longer excitation wavelengths of 460nm to 480nm.
- High brightness green LEDs using this phosphor can be used for signals, signage, decoration and RGB display backlight.

Emission Spectrum

Particle Size Distribution

Material Specifications:

Materials	<i>Eu doped Silicates</i>
Density	<i>4.82 g/cm³</i>
Particle Size	<i>D50 (V) ~ 15µm</i>
CIE (1931)	<i>x=0.307, y=0.617</i>
Emission Peak	<i>530nm</i>
Excitation Range	<i>200 nm to 490nm</i>
