

DATASHEET

GNYAG3657-01-11

Product Description and Application:

- GNYAG phosphor extends the versatility of YAG phosphor into the shorter wavelength green emission range, enabling 80 min CRI for general lighting applications.
- The high reliability and thermal stability of GNYAG3657, characteristic of YAG phosphors, make this broad emission green phosphor applicable for medium to high power LEDs (up to 2W). GNYAG3657 offers high CRI (80-83) for blue LED wavelengths 450-455nm, ideal for low CCT, 2700-3000K.

Material Specifications:

Materials	Garnet
Density	5.0 g/cm ³
Particle Size	D50V ~ 11µm
CIE (1931)	x=0.361, y=0.568
Emission Peak	531nm
Excitation Range	430nm to 490nm
