## EY4750

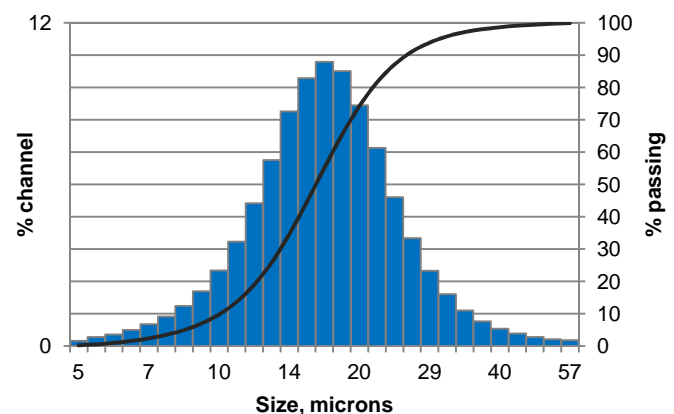

### Product Description and Application:

- EY4750 silicate phosphor is designed for low to mid-power white illumination.
- It can be used in combination with other EY series products for color tuning and to achieve a broader emission spectrum. EY4750 can be excited by a wide range of wavelengths from blue to near UV. The deep yellow color allows access to warmer white using a single phosphor.
- EY4750 can be used for high brightness white LEDs in mobile display backlighting, general and task lighting, camera flash, signage, decoration, and automotive applications.

Emission Spectrum

Particle Size Distribution

### Material Specifications:

Materials	<i>Eu doped Silicates</i>
Density	<i>4.7 g/cm<sup>3</sup></i>
Particle Size	<i>D50V ~ 15.5µm</i>
CIE (1931)	<i>x=0.470, y=0.510</i>
Emission Peak	<i>574nm</i>
Excitation Range	<i>200nm to 490nm</i>
